Adaptability |
Effective Communication |
Teamwork | Problem Solving

INTERESTS

- Visual Podcast Viewer

Arjun Dangi

Full Stack Web Developer

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with expertise in the MERN stack, including MongoDB, Express.js, React.js, and Node.js. Collaborative team player experienced in translating project requirements into functional and scalable web applications. Proactive and self-motivated with a dedication to organizational and personal growth. Strong problem-solving and communication skills, with a focus on delivering high-quality, reliable web applications.

PROJECTS

1. Travelious | |

JavaScript | React | Redux | Node.js | Express.js | MongoDB

- Built a Full Stack travel booking website using the MERN stack.
- Independently managed all aspects of the backend.
- Contributed to the creation of the Login and Signup, tour detail page, navbar, and profile page with user booking history.
- Implemented features such as Login & Signup, Book and Update Tour, Payment, and Booking History.

2. Auction Website | |

JavaScript | React | Redux | Node.js | Express.js | MongoDB | Socket IO | Tailwind

- Created a comprehensive auction platform using the MERN stack
- Implemented real-time bidding and automated auction closures for a seamless experience
- Implemented features for users to login, signup, sell products, purchase products, and place bids
- Utilized Socket IO for real-time updates.
- Managed all aspects of the project independently

3. Instagram Clone | |

TypeScript | React | Redux | Node.js | Express.js | MongoDB | Chakra UI

- Developed a fully-featured Instagram clone using the MERN stack
- Contributed to the profile page, follow, and Unfollow functionality
- Contributed to the implementation of post routes and follower routes in the backend.
- The project has features such as login/signup, creating posts, chat, follow user, comment, and like
- Utilized Socket.IO for real-time messaging and updates.

4. Medium Clone | |

JavaScript | React | Redux | Node.js | Express.js | MongoDB | Tailwind

- Developed a Medium Clone using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Implemented features like login & signup, create, update, and delete blogs, and profile page
- Utilized Redux for state management and Tailwind CSS for styling
- Managed all aspects of the project independently
